

PIERBURG

BF ORIGINAL

PRODUCT **RANGE**

OIL COOLER

TARGETED REDUCTION OF OIL TEMPERATURE
FOR PASSENGER CARS, TRUCKS AND OFF-HIGHWAY

Spare parts. Anywhere. Anytime.

MS MOTORSERVICE

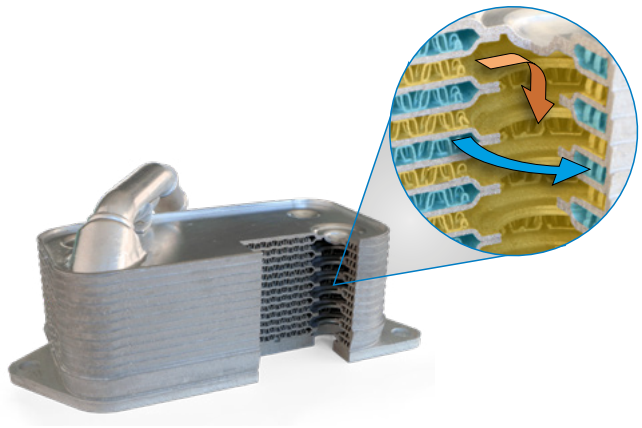

Oil coolers are used in most engines to achieve targeted reduction of the oil temperature. The temperature output to the engine coolant circuit can reduce the oil temperature by up to 30 °C.

No risks should be taken when it comes to cooling of the motor and gearbox. This makes it all the more important to rely on quality.
Oil coolers and oil cooler modules for passenger cars under the Pierburg brand complement the range for utility vehicles under the BF brand and offer repair shops huge market potential.

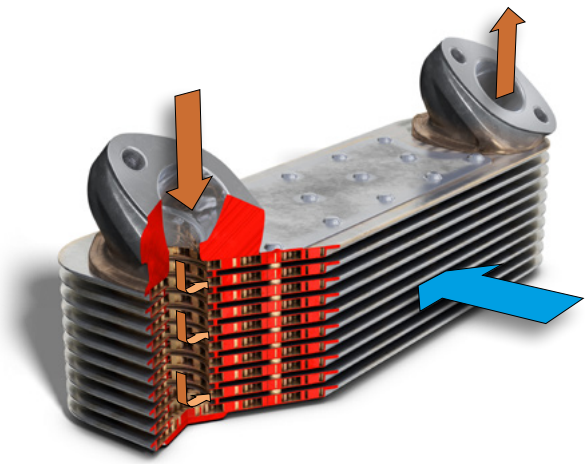

Heavy-duty engine parts such as pistons use the engine oil not only for lubrication and as a sealant, but also for cooling. The oil circulates in a closed circuit from the oil pan via the oil pump to the moving engine parts and back into the oil pan. An oil cooler integrated into the oil circuit provides additional cooling. Oil coolers are usually made of aluminium or stainless steel.

Multiple plates arranged on top of each other form separate channels, alternating between one channel for oil and one cooling channel. To improve heat transfer, the channels are usually equipped with lamellae, which increase the surface area. Coolant agent or cooling water is normally used for cooling in the cooling channel, or the head wind is used.

Passenger car oil cooler

Truck oil cooler

ENGINE AND TRANSMISSION OIL COOLERS FOR PASSENGER CARS

We have expanded our product range to include oil coolers for passenger cars under the Pierburg premium brand. They are available as engine oil coolers and transmission oil coolers. The matching seals are included in the scope of supply.

The products boast OE quality and can already offer repair shops a potential market of over 300 million vehicles across the globe – and the product range is continuously being expanded.

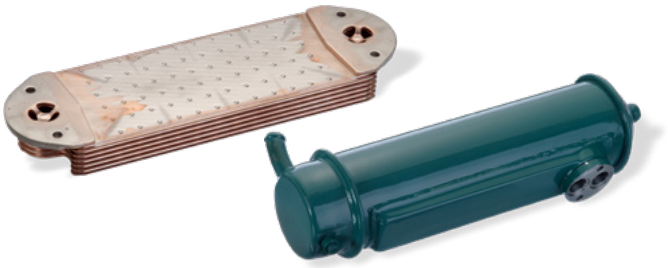

OIL COOLER MODULES FOR PASSENGER CARS

In addition to individual oil coolers, we also offer pre-assembled oil cooler modules under the Pierburg brand. These consist of an oil cooler, oil filter housing, oil filter and the required gaskets. Pre-assembly significantly reduces time and costs in the repair shop.

Motorservice is one of the best known suppliers of these oil cooler modules in the independent aftermarket sector. Some modules are available as plastic or aluminium versions.

ENGINE OIL COOLERS FOR TRUCKS AND OFF-HIGHWAY

The existing oil cooler range for utility vehicles and industrial applications has also been considerably expanded. Under the BF brand, we offer oil coolers for over 55 engine applications from the Big Seven.

OIL COOLERS FOR RETARDER BRAKES

Retarder brakes are additional brakes for heavy trucks and relieve the strain on regular brakes, e.g. during long descents. The oil cooler dissipates the heat generated in the retarder brake, thus ensuring additional safety.

We provide a comprehensive product portfolio for a wide range of engines – our aftermarket oil coolers are listed below:

Engine oil coolers for passenger cars

KNOW-HOW TRANSFER
PROFESSIONAL KNOWLEDGE FROM THE EXPERTS

WORLDWIDE TRAININGS
Each year, around 4,500 mechanics and engineers benefit from our training courses and seminars, which we hold on-site in locations across the world or in our training centres in Neuenstadt, Dormagen and Tamm (Germany).

TECHNICAL INFORMATION
Our Product Information and Service Information publications, technical brochures and posters keep you at the forefront of the latest technological developments.

TECHNICAL VIDEOS
Our videos provide you with useful information on our products, such as hands-on fitting instructions and system descriptions.

YouTube

ONLINESHOP
Order at any time. Quick availability check. Extensive product search by engine, vehicle, dimensions etc..

NEWS
Subscribe online to our free newsletter now and receive regular information about additions to the product range, technical publications and much more.

INDIVIDUAL INFORMATION
We provide extensive information and services relating to our wide range of services: e.g. personalised sales-promoting materials, sales support, technical support and much more.

myMOTORservice

TECHNIPEDIA
We share our know-how with you in our Technipedia. You can get professional knowledge direct from experts here.

MOTORSERVICE APP
Here, you will find the latest information and services relating to our products quickly and easily.

SOCIAL MEDIA
Always up to date
