

**Control units for
fuel pumps – suitable for
10 million vehicles**

Our offer for you

Our tailor-made offer for a wide market coverage

We have expanded our product range for you: With 19 control units for fuel pumps, you achieve a wide market coverage of 10 million vehicles in the aftermarket. Stay a step ahead of your competitors, use our offer and supply your customers with tailored products in OE quality.

The control unit is part of the fuel supply in modern FSI-, TSI-, TFSI and TDI engines. It receives its control signals via the CAN bus and controls the fuel pump in the fuel delivery module according to demand.

This means that, in contrast to unregulated fuel supply, only the required amount of fuel is supplied. This reduces power consumption and saves fuel.

Engine control unit

Control unit for fuel delivery module

Real all-rounder: 19 control units for fuel pumps for 10 million vehicles

**Pierburg fuel supply –
optimal performance
and low fuel consumption**

Pierburg products

- 01 Fuel delivery module (in-tank)
- 02 Fuel level sensor
- 03 Activated carbon filter shut-off valve
- 04 Activated carbon filter regeneration valve
- 05 Fuel pump (in-line)
- 06 Fuel filter (Kolbenschmidt)
- 07 Fuel non-return valve
- 08 Tandem pump fuel/vacuum
- 09 High-pressure fuel pump
- 10 Fuel pressure regulator
- 11 Fuel pump control unit

**We are constantly expanding our product range.
Control units suitable for BMW and Mercedes-Benz will
be available from Motorservice soon.**
