**This fuel pump which has been newly included in our line of products offers to you a price-conscious replacement solution for the BMW vehicles from the 3 series model range (E46).**

The in-tank pump is supplied with a preassembled intake filter in a mount. In case of a replacement it is not necessary to replace the entire pumping module.

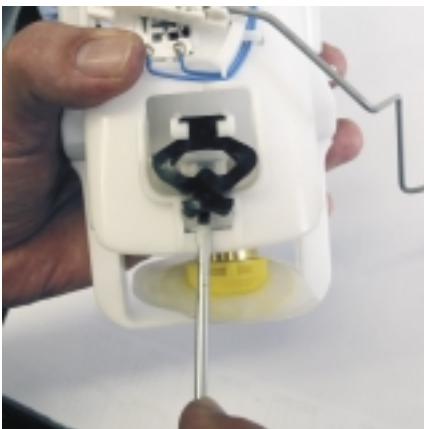

**In the case of this solution which takes into account environment aspects, only the pump in the pumping unit is replaced.**

 The unproblematic replacement is described in detail in the installation instructions (supplied with the pump).

Only the pump unit is replaced

Pierburg replacement pump

Easy to replace

Technical Data	
Design:	Pump with inner tooth ring and side channel pre-stage
Nominal voltage: [V]	12
System pressure: [bar]	3.5
Pumping capacity: [l/h]	130 approx.
Current consumption: [A]	9.5 max. (at system pressure)

The right of changes and deviating pictures is reserved.

Assignment and usage, refer to the each case current catalogues, TecDoc CD respectively systems based on TecDoc.

\*) The reference numbers stated serve only the purpose of comparison and must not be used in invoices for the end user.
